Solution 6000

The Alarm System made for your home

The Solution 6000 Alarm System offers an extensive feature listing including numerous wire free options, high speed windows programming software and the simplest user - installer interface on the market today.

BOSCH

Invented for life

Solution 6000 – Your home security solution

You have a responsibility to your family and your home to protect them. Should a burglary or other incident occur, the loss is not just the items destroyed or stolen – it's the loss of comfort and security that your home once provided. The Solution 6000 from Bosch Security Systems provides you with an expandable solution that can be tailored to fit your needs perfectly. With future focused technology and the ability to adapt to your changing needs and home environment, Bosch have eliminated the complexities of finding the right security solution for you. Look no further than the Solution 6000 to unlock the alarm solution that your home has been looking for.

Simple to use, with plenty of **flexibility**

Simple Operation

The standard Bosch keypad features a graphical user interface that incorporates a text-driven menu system. Colour coded, illuminated keys make it easy to operate your security system, day or night. Red and green indicators provide easy identification of Armed and Disarmed modes, and the built-in sounder provides audible feedback when operating the system.

Where required for external applications, stainless steel weatherproof keypads are also available in slimline or standard fit, designed to complement any building facade.

Easy Remote Arming

The Solution 6000 can be programmed to use a wireless remote that easily fits onto your keyring. These small remote controls allow you to arm and disarm your home by simply pressing one button.

The wireless remote can also be used to set the system in STAY mode, act as a portable panic button, and can even be used to switch lights and open gates & doors.

Flexibility

Solution 6000 can be programmed to manage 144 zones that can be divided into 8 separately controlled areas. The 144 fully programmable intrusion zones can support sensors fitted to doors and windows, motion sensors and smoke detectors. When events are detected, the Solution 6000 can sound sirens, transmit events to your monitoring service provider and activate lights, providing security you can rely on 24 hours a day. Your Solution 6000 can store up to 1000 events ie. arm/disarm functions and door access reports for each user, which can be viewed from the keypad by the master user. This way you can monitor the movements of your children daily if required.

With 5 on-board outputs (expandable to 37), and one already preprogrammed for a roller shutter or garage door, your Solution 6000 can cater for all your home automation requirements, including lighting, air conditioning, irrigation - just about anything that is controlled via a switch and can be programmed.

Reliable protection need not cost a fortune!

Protecting Your Assets

The Solution 6000 provides the flexibility to divide your alarm system into a number of separately controllable areas including a common area hallway, or garage/workshop. For your convenience the Solution 6000 can be configured to use a single key pad for all areas, or individual key pads for each area.

Cost Effective Technology

State-of-the-art security technology has previously been unattainable for some due to prohibitive costs. Now, the Solution 6000 eliminates this obstacle, thanks to its unrivalled price / performance ratio. The benefits begin with the installation stage itself, which is straightforward, inexpensive and, if you wish, wireless. Complex security installations are now a thing of the past.

High Speed, High Security

The security system communicates with other system modules via the built-in high speed connection (RS485 LAN), and for increased security, uses high level encryption. In this way, devices can be placed up to 1.2km from the control panel itself, making the system extremely flexible.

The GSM/GPRS and Ethernet options provide a high security backup communications path to phone line reporting, or can be used as the primary reporting path where VOIP or digital communications are used in the building.

24 Hour Protection

The Solution 6000's chime mode allows you to audibly monitor a zone or group of zones while your system is disarmed. The chime mode feature is extremely useful for monitoring driveways and garage doors too. This fully automatic self testing unit allows you to forget the system is there, while knowing you are still protected.

Versatility

The Solution 6000 offers you a wide choice of features and options, which coupled with the vast range of accessories available from Bosch Security Systems, ensures a system can be designed to suit your specific needs. Whether your home is large or small, Bosch Security has a solution for you.

Main features & key accessories:

- Up to 144 zones & 256 users
- Full text menu display for programming & user control
- Supported communication formats include Conettix IP, GSM, SMS, Email, CID, GPRS, CSV IP, SIA 3+ Text, Voice and Domestic Dial
- SMS via Bosch GSM & SMS panel control ie. arm, disarm
- Up to 37 outputs available with one on-board dedicated relay programmed for roller doors

Motion Detectors

Our range includes PIR, TriTech, Anti-masking as well as pet-friendly, PIR Curtain, wireless & outdoor motion detector options that incorporate industry-leading Bosch motion detector technology for superior catch performance and reduced false alarms.
